Introduction

This directory of members provides key information about ETIM International, the network of National ETIM Organisations and the key contacts responsible for the development of the ETIM Standard and its promotion in over 20 countries across the globe.

If ETIM does not already have a presence in your country and you are interested in finding out more about becoming the National ETIM Organisation, please contact ETIM International, using the contact details below.

If ETIM already exists in your country and if you want to find out more, either as a company wishing to adopt ETIM in your business or as an organisation wishing to represent an ETIM sector not already represented, please contact your National ETIM Organisation. You will find contact information in the following pages.

Kind regards,

Magnus Sirén
President, ETIM International

2. Official ETIM chapter organisations

Official ETIM Chapter organisations are regional entities that oversee the implementation and promotion of the ETIM standards within their respective territories. Their primary duties include facilitating the localization and translation of the ETIM model to suit regional market needs, supporting member companies in the adoption and integration of ETIM standards, and promoting the benefits of ETIM to industry stakeholders. These organisations also collaborate with the ETIM International headquarters to ensure consistency and alignment across different markets, engage in training and educational activities, and provide a platform for feedback and continuous improvement of the ETIM model.

The following pages describe our officially recognized ETIM chapter organisations, their activities and contact details.

2.1. ETIM Australia and New Zealand

Membership details

- Multi country membership (Australia, New Zealand)
- Sectors: Electrotechnical; HVAC and Plumbing; Building Materials; Tools, Hardware, and Site supplies
- Joined in 2021

Organisation details

ETIM Australia and New Zealand was founded by the Australian Industry Group (Ai Group) to “make it easier for the Australian and New Zealand industry to find and select the right product for their needs, the first time, through a standardised classification model.”
